PL

Jesteśmy firmą produkująca elementy małej architektury z aluminium, stali cor-ten, nierdzewnej oraz czarnej. Posiadamy własny park maszynowy do obróbki metalu, lakiernie proszkową i dział projektowy z niezbędnym know-how zdobywanym przez 20 lat naszej działalności – co pozwala oferować nam nie tylko produkty z katalogu, ale również realizację wszelkich projektów zgodnych z koncepcją klienta. Jesteśmy jedną z największych firm tego typu w Europie. Nasze produkty powstają z blach o grubości od 0,5 do 20 mm. Proces produkcyjny zaczynamy od pomysłu, poprzez stworzenie dokumentacji, aż do dostarczenia gotowego produktu w miejsce wskazane przez klienta.

W naszych projektach najchętniej wykorzystujemy cor-ten - specjalny rodzaj stali, która pod wpływem czynników atmosferycznych pokrywa się cienką warstwą patyny, przypominającą rdzę, nadając jej przy okazji niepowtarzalny charakter oraz przy odpowiedniej eksploatacji czyniąc ją długowieczną. Nasze doświadczenie pozwala nam przyspieszyć lub zatrzymać zjawisko powstawania patyny.

EN

We are a company that produces elements of small architecture from aluminum, cor-ten, stainless and black steel. We have our own machine park for metal processing, a powder painting and a design department with the necessary know-how gained over 20 years of our activity - which allows us to offer not only products from the catalog, but also the implementation of all projects in accordance with the customer's concept. We are one of the largest companies of this type in Europe. Our products are made of metal sheets with a thickness of 0.5 to 20 mm. We start the production process from an idea, through the creation of documentation, to delivery of the finished product to the place indicated by the customer.

In our projects, we most often use cor-ten - a special type of steel, which under the influence of weather conditions is covered with a thin layer of patina, resembling rust, giving it a unique character and, when properly used, making it long-lasting. Our experience allows us to accelerate or stop the phenomenon of patina formation.

DE

Wir sind ein Unternehmen, das Elemente kleiner Architektur aus Aluminium, Cor-Ten, Edelstahl und schwarzem Stahl herstellt. Wir verfügen über einen eigenen Maschinenpark für die Metallbearbeitung, eine Pulverlackiererei und eine Konstruktionsabteilung mit dem nötigen Know-how aus 20 Jahren unserer Tätigkeit – wodurch wir nicht nur Produkte aus dem Katalog anbieten können, sondern auch die Umsetzung aller Projekte nach dem Konzept des Kunden. Wir sind eines der größten Unternehmen dieser Art in Europa. Unsere Produkte werden aus Blechen mit einem Dicken von 0,5 bis 20 mm hergestellt. Wir beginnen den Produktionsprozess von der Idee über die Erstellung der Dokumentation bis hin zur Lieferung des fertigen Produkts an den vom Kunden angegebenen Ort.

In unseren Projekten verwenden wir am häufigsten Cor-Ten - eine spezielle Stahlsorte, die unter Witterungseinflüssen mit einer dünnen Patinaschicht überzogen wird, die an Rost erinnert, ihr einen einzigartigen Charakter verleiht und bei richtiger Verwendung zu einer lange andauernd. Unsere Erfahrung ermöglicht es uns, das Phänomen der Patinabildung zu beschleunigen oder zu stoppen.

DK

Wij zijn een bedrijf dat elementen van kleine architectuur produceert van aluminium, cortenstaal, roestvrij staal en zwart staal. We hebben ons eigen machinepark voor metaalbewerking, een poederlakwinkel en een ontwerpafdeling met de nodige knowhow die we in 20 jaar van onze activiteit hebben opgedaan - waardoor we niet alleen producten uit de catalogus kunnen aanbieden, maar ook de implementatie van alle projecten volgens het concept van de klant. Wij zijn een van de grootste bedrijven van dit type in Europa. Onze producten zijn gemaakt van metalen platen met een dikte van 0,5 tot 20 mm. We starten het productieproces van een idee, via het maken van documentatie, tot de levering van het eindproduct op de door de klant aangegeven plaats.

In onze projecten gebruiken we meestal cor-ten - een speciale staalsoort, die onder invloed van weersomstandigheden wordt bedekt met een dunne laag patina, die lijkt op roest, waardoor het een uniek karakter krijgt en, bij correct gebruik, het langdurig. Onze ervaring stelt ons in staat het fenomeen patinavorming te versnellen of te stoppen.

FR

Nous sommes une entreprise qui produit des éléments de petite architecture en aluminium, corten, inox et acier noir. Nous disposons de notre propre parc de machines pour l'usinage des métaux, d'un atelier de peinture en poudre et d'un bureau d'études avec le savoir-faire nécessaire acquis au cours de 20 ans d'activité - ce qui nous permet de proposer non seulement des produits du catalogue, mais aussi la mise en œuvre de tous projets selon le concept du client. Nous sommes l'une des plus grandes entreprises de ce type en Europe. Nos produits sont constitués de tôles d'une épaisseur de 0,5 à 20 mm. Nous commençons le processus de production à partir d'une idée, en passant par la création de la documentation, jusqu'à la livraison du produit fini à l'endroit indiqué par le client. Dans nos projets, nous utilisons le plus souvent du cor-ten - un type d'acier spécial qui, sous l'influence des conditions météorologiques, est recouvert d'une fine couche de patine, ressemblant à de la rouille, lui conférant un caractère unique et, lorsqu'il est correctement utilisé, le rendant durable. Notre expérience nous permet d'accélérer ou d'arrêter le phénomène de formation de patine.

CZ

Jsme společnost zabývající se výrobou prvků drobné architektury z materiálů jako je hliník, corten, nerez a černá ocel. Disponujeme vlastním výrobním zázemím pro zpracování kovů, práškovou lakovnou a konstrukčním oddělením s potřebným know-how získaným za 20 let naší činnosti - to nám umožňuje nabízet nejen typizované produkty, ale i realizaci projektů na míru v souladu s vlastní koncepcí zákazníka. Jsme jednou z největších společností tohoto typu v Evropě. Naše výrobky jsou vyrobeny z kovových plechů o tloušťce 0,5 až 20 mm. Výrobní proces začíná nápadem, pokračuje vytvořením výrobní dokumentace a končí dodáním hotového výrobku na místo určené zákazníkem.

V našich projektech nejčastěji používáme corten - speciální druh oceli, která se vlivem povětrnostních podmínek pokryje tenkou vrstvou patiny připomínající rez, dodává jí jedinečný charakter a zbarvení. Při správném používání jsou výrobky z cortenové oceli velmi odolné a naprosto bezúdržbové. Naše zkušenosti nám umožňují urychlit nebo zastavit proces vzniku cortenové patiny.
