DESIGN TO GROW

**CARREZ Connect**

## CARREZ Connect

This planter with square corners looks great in gardens with clean lines. The sleek, double-turned edge gives it a sturdy appearance. The CARREZ is also ideal for use as a divider in hospitality venues.

# Material corten steel

The CARREZ corten steel planter will add warmth and boldness to any garden, thanks to the orange-brown patina on the metal. This patina is formed by a natural layer of rust. Another name for corten iron is weathering steel: weather conditions have a positive effect on this planter.

Corten steel is a metal alloy made by adding copper, phosphorus, silicon, nickel and chromium to steel. When exposed to air, the material forms a protective layer of rust. This natural coating prevents further corrosion, extending the planter's life.

## SPECIFICATIONS

- 5-year guarantee.
- Corten steel planters are very robust, hard-wearing, weatherproof, low-maintenance and durable.
- The corten steel has a standard thickness of 2 mm.
- This product is delivered ready for self-assembly, making it ideal for placement around an established tree or plant.
- Includes bolts, nuts and assembly instructions.
- Products are delivered without rust. The corten steel rusting process takes about 4-5 months, depending on weather conditions.
- The rust can be fixed by applying Owatrol. This is a penetrating rust inhibitor that forms a protective anti-rust coating. Owatrol protects the planter and stops the rust on corten steel flaking off.

## KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. If the product is left in its packaging, it may develop uneven rust patches.
- Ensure proper drainage.
- Do not use hydro pellets: they retain moisture.
- We do not recommend using corten steel within 2 km of a coastline.
- The weathering process may cause rust run-off.
- The guarantee expires if you drill or grind in a way that is not specified.

# Material coated steel

The CARREZ galvanised steel planter gives gardens a timeless look. The planter's finish ensures that it is corrosion resistant and will last for many years outdoors.

Galvanised steel has a protective layer of zinc. Once constructed, the coated steel planter is given several finishing treatments. The metal is roughened to allow better adhesion of the powder coating. This is applied with a strong adhesive primer. Finally, the planter is finished with a hard topcoat of Qualicoat class 2. These layers ensure that the planter is of very high quality and scratch resistant.

## SPECIFICATIONS

- 5-year guarantee.
- Coated steel planters are very robust, hard-wearing, durable, and resistant to corrosion.
- The corten steel has a thickness of 2 mm.
- Scratch-resistant topcoat.
- This product is delivered ready for self-assembly, making it ideal for placement around an established tree or plant.
- Available in RAL 7016, RAL 7021, RAL 9005, and RAL 9016 as standard. This product can be supplied in other colours for an additional charge.

## KEY POINTS TO NOTE

- Products should be unpacked immediately upon receipt to release any moisture trapped inside the packaging. This moisture can cause stains that are difficult to remove.
- For planters with a base: Keep the drainage holes clear so that excess water can run off.
- The guarantee will become void if the product is drilled or scoured etc. contrary to recommendations.
- Clean annually by hosing dirt from the planter with clean tap water, then clean with detergent. Do not use a pressure washer and/or scouring pad. This damages the coating.

## RAL COLOURS

Standard RAL colours are RAL 7016, RAL 7021, RAL 9005 and RAL 9016.

For all other available RAL colours, please check our website. There is a start-up charge for these colours.

**Note!** Colours may vary from the image.

# Placement corten steel

Our CARREZ connect comes as a self-assembling product. All the parts you need to assemble the product are included in the package. For the construction and shape stability of the product, mounting U-profiles and tie rods is essential. Therefore, always install these if they are included.

## WALLS

1. It is important that the product is positioned on a firm, levelled surface. If the ground is not level, the weight of the planter will be unevenly distributed. This can cause stress damage.
2. When fitting the U-profiles, the end cap on the top with the short setting should face the rear panel.
3. Use an M8x30 bolt to attach the U-profile to the top. Use an M8x20 bolt combined with 2 washers and an M8 nut on the underside. Place the bolts with the bolt heads facing up so that the planter eventually stands on the bolt heads.
4. Connect the 4 side panels while they are standing on their top edge on the ground. This means that the planter will only need to be turned once during construction.

### CORNER PLATES

5. Use M8x20 bolts and tighten them until they are hand-tight. These can be tightened fully after fitting the corner plates.
6. If corner plates are supplied, attach these to the corners. They should be fitted to the inside of the planter, with the raised edge towards the upper rim of the planter.
7. Use M8x20 bolts and hand-tighten them first. Place the bolts with the bolt heads facing up so that the planter eventually stands on the bolt heads.
8. When all the bolts are in place, they can be fully tightened.

### PULL RODS

9. Attach tie rods between the two long panels. If the planter you have ordered needs tie rods, these will be included. The tie rods provide essential structural stability to the planter and help it retain its shape.
10. Loosen the M8x20 bolts at the bottom of the planter and insert the lower tie rod (the top rod in the diagram) into the U-profiles.
11. Attach the second tie rod halfway up the planter using the M8x100.

### FINISHED!

12. When all panels and profiles are attached and the bolts are tightened, turn the planter over. Follow the planting advice below to get the most out of this beautiful planter!

## Placement coated steel

Our CARREZ connect comes as a self-assembling product. All the parts you need to assemble the product are included in the package. For the construction and shape stability of the product, mounting U-profiles and tie rods is essential. Therefore, always install these if they are included.

In addition, it is recommended to assemble the CARREZ coated connect on a soft surface, such as grass or a blanket, so that the planter does not scratch.

### WALLS

1. It is important that the product is positioned on a firm, levelled surface. If the ground is not level, the weight of the planter will be unevenly distributed. This can cause stress damage.
2. Use an M8x30 bolt to attach the U-profile to the top. Use an M8x20 bolt combined with 2 washers and an M8 nut on the underside. Place the bolts with the bolt heads facing up so that the planter eventually stands on the bolt heads.

### FINISHED!

11. When all panels and profiles are attached and the bolts are tightened, turn the planter over. Follow the planting advice below to get the most out of this beautiful planter!

# Planting advice

1. Fill the bottom of the planter with a layer of gravel (Ø35 mm grading, approx. 10 cm).
2. Place a permeable anti-root membrane over the gravel.
3. Cover the membrane with soil suitable for your chosen plants.

# Accessories

All our accessories meet the highest standards and are an highly suitable addition to our products. Visit [www.adezz.com](http://www.adezz.com) for a complete overview of our accessories.

## CORTEN VARNISH

### CORTEN STEEL

Corten varnish can be applied to the corten steel products to stop the weathering process. Always read the descriptions on the packaging carefully before use.

## RUST ACCELERATOR

### CORTEN STEEL

Our corten steel products are delivered un-rusted and the weathering process will take approximately 4-5 months. This process can be accelerated with the BIO rust accelerator available on our website. Always read the descriptions on the packaging carefully before use.

## CLEANER & PROTECTOR

### COATED STEEL

We recommend cleaning our products at least twice a year. For optimal results, use the ADEZZ BIO Cleaner & Protector. Always read the descriptions on the packaging carefully before use.

# ADEZZ

DESIGN TO GROW

Spending time outdoors has soared in popularity over the last few years, becoming an increasingly important part of our daily lives. Our brands ADEZZ, FORNO and FURNS offer a diverse range of products guaranteed to enhance the outdoor experience. Our collections create an ambience in which you can enjoy your garden to the fullest.

All brands have their own character, but they are designed to work together, allowing you to create endless combinations. The materials, finishes and styles are repeated across the collections so that they coordinate beautifully. The result? A long-lasting, stylish garden design: from sleek edging to exclusive furniture and from sturdy fireplaces to elegant water tables.

We design and manufacture all our products in-house, ensuring that we can continue to provide the high quality that you have come to expect from us. And we do this at the most competitive price possible. All our products are made in Europe with the utmost care, so we can be sure that they meet our exacting standards.
